Exam Number/Code:MS-900

Exam Name: Microsoft 365
Fundamentals

Version: Demo

Q1

DRAG DROP

You are implementing cloud services.

Match each scenario to its service. To answer, drag the appropriate scenario from the column on the left to its cloud service on the right. Each scenario may be used only once.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Scenarios	Service	Scenario
Exchange Online integrated with on-premises Skype for Business Server	Software as a service (SaaS)	
Custom web and mobile application securely connected to an on-premises data store	Platform as a service (PaaS)	
Server-based workloads on a virtual machine connected to an on-premises network	Infrastructure as a service (IaaS)	

Answer:

Answer Area

Scenarios	Service	Scenario
Exchange Online integrated with on-premises Skype for Business Server	Software as a service (SaaS)	Exchange Online integrated with on-premises Skype for Business Server
Custom web and mobile application securely connected to an on-premises data store	Platform as a service (PaaS)	Custom web and mobile application securely connected to an on-premises data store
Server-based workloads on a virtual machine connected to an on-premises network	Infrastructure as a service (IaaS)	Server-based workloads on a virtual machine connected to an on-premises network

Q2

You need to identify which Microsoft platforms provide hybrid capabilities for migrating from an on-premises deployment.

Which two platforms provide hybrid capabilities for migration? Each Answer provides a complete solution. (Choose two.)

NOTE: Each correct selection is worth one point.

- A. Microsoft Skype for Business
- B. Microsoft Yammer
- C. Microsoft Exchange
- D. Microsoft Teams

Answer:AC

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/architecture-of-microsoft-hybrid-cloud-scenarios>

Q3

A company is moving to Microsoft Azure. Some applications cannot be moved.

You need to identify which applications will remain in a hybrid environment after the migration.

Which applications will remain in a hybrid environment?

- A. applications that manage sensitive information
- B. applications that use a USB-token device to control access
- C. legacy applications that use a message-based interface
- D. a new server that runs several line-of-business applications

Answer:A

Q4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area		
Statement	Yes	No
Microsoft cloud services offer significant energy savings for Microsoft and its customers.	<input type="radio"/>	<input type="radio"/>
Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.	<input type="radio"/>	<input type="radio"/>
Microsoft cloud services offer security options and have the ability to provision resources quickly.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statement	Yes	No
Microsoft cloud services offer significant energy savings for Microsoft and its customers.	<input checked="" type="radio"/>	<input type="radio"/>
Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft cloud services offer security options and have the ability to provision resources quickly.	<input checked="" type="radio"/>	<input type="radio"/>

Q5

DRAG DROP

You are the Microsoft 365 administrator for a company.

You must provide infrastructure recommendations. All proposed solutions must minimize costs.

You need to identify the appropriate cloud model for the given scenarios.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Cloud models	Answer area	Cloud model
Private	Provide an on-demand sandbox environment.	Cloud model
Public	Provide failover capabilities between resources that you manage and resources in other regions.	Cloud model
Hybrid	Deploy virtual machines that supports USB devices.	Cloud model

Answer:

Cloud models	Answer area	Cloud model
Private	Provide an on-demand sandbox environment.	Public
Public	Provide failover capabilities between resources that you manage and resources in other regions.	Public
Hybrid	Deploy virtual machines that supports USB devices.	Hybrid

Q6

You are the Microsoft 365 administrator for a company.

The company runs SharePoint Server and Exchange Server in an on-premises datacenter. The site collection for the finance department is currently encrypted using third-party software.

You need to move as many services to Microsoft 365 as possible.

What should you do?

- A. Migrate all SharePoint data and Exchange mailboxes to Microsoft 365.
- B. Leave SharePoint data for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.
- C. Leave mailboxes for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.
- D. Leave SharePoint data and mailboxes for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.

Answer:A

Q7

A company has an Exchange Server environment. The company plans to migrate to the cloud.

You need to recommend a cloud model that meets the following requirements:

Upgrade the existing email environment

Minimize server and application maintenance

Which model should you recommend?

- A. Platform as a service (PaaS)
- B. Windows as a service (WaaS)
- C. Software as a service (SaaS)
- D. Infrastructure as a service (IaaS)

Answer:C

Q8

DRAG DROP

You are the Azure administrator for a company. The company uses only Platform as a Service (PaaS).

You need to identify which solution components Microsoft must manage and which solution components your IT staff must manage.

Match each management owner to its component. To answer, drag the responsible party from the column on the left to its component on the right. Each party may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Responsible parties

- IT staff
- Microsoft

Component

Responsible party

- Applications
- Operating systems
- Storage
- Application data

Answer:

Answer Area

Responsible parties

- IT staff
- Microsoft

Component

Responsible party

Applications	IT staff
Operating systems	Microsoft
Storage	Microsoft
Application data	IT staff
